

Marie Curie POST-DOC FELLOWSHIP APPLICATION in Chordate Functional Evo-Devo and Genomics

University of Barcelona
Department of Genetics

Our new group on the field of **Functional Evo-Devo and Genomics on Chordates** is looking for candidates to apply for the forthcoming FP7 **POST-DOC FELLOWSHIP** from the **Marie Curie** program (IIF and IEF Calls now opened)

<http://ec.europa.eu/research/participants/portal/page/people&state=open>

Candidates have to be enthusiastic, and need to have a competitive CV to successfully apply for the fellowship. Experience in Molecular Genetics, Transgenesis and Developmental Biology, and (or) Background in Bioinformatics, and Comparative Genomics will be positively considered.

Our main research interest is to understand the impact of gene losses on the evolutionary diversification of mechanisms of development in chordates. Our work focuses on comparative approaches between vertebrates (zebrafish), urochordates and cephalochordates. Our main subject of study is *Oikopleura dioica*, a new emergent urochordate model within our own phylum, with the smallest genome size known so far in all metazoans, and with an outstanding amount of gene losses (Denoeud et al., Science, 2010).

Interested candidates, please send a brief letter of interest and a CV in ONE single pdf file to Cristian Cañestro (canestro@ub.edu)

Interested candidates for future POST- or PRE-DOCTORAL applications, please feel free to contact too.
